Summary

Software Engineer with 2+ years of experience developing enterprise financial applications using Java, Spring Boot, Angular, and PostgreSQL. Experienced in designing secure REST APIs, backend services, and production systems for financial platforms, with expertise in debugging, performance optimization, and Agile software development. Currently pursuing a Master of Information Technology at RMIT University while building an enterprise digital banking platform focused on secure payments, authentication, and scalable software engineering practices.

Education

RMIT University

Masters of Information Technology

2025 - 2026

Melbourne

Experience

Cognizant - Software Engineer

Chennai, India

Aug. 2022 – Dec 2024

Client: Lincoln Financial Group (USA)

- Developed and maintained enterprise financial applications using Java and Spring Boot in production environments.
- Designed and implemented secure REST APIs supporting financial transactions and customer data processing.
- Built backend services for account and policy management while ensuring data integrity and application reliability.
- Integrated backend services with PostgreSQL and optimized SQL queries for improved application performance.
- Developed and maintained scheduled batch jobs using Autosys to automate business-critical processing workflows.
- Investigated and resolved production issues through debugging, log analysis, and root cause identification.
- Collaborated with business analysts, QA engineers, and development teams in Agile sprints while participating in code reviews and software testing.

Client: TIAA (Teachers Insurance and Annuity Association - USA)

- Collaborated with business stakeholders to translate functional requirements into scalable software solutions.
- Developed backend services using Spring Boot and frontend components using Angular for enterprise applications.
- Designed, implemented, and tested REST APIs supporting integration across multiple internal systems.
- Worked closely with QA engineers and business analysts to deliver reliable software within Agile development cycles.
- Supported production systems by maintaining backend processing, scheduled jobs, and issue resolution.

Software Engineer Intern

Cognizant Technology Solutions

2022

Chennai, India

- Assisted in developing backend services using Java and Spring Boot.
- Developed and tested REST APIs while supporting application integration.
- Worked with PostgreSQL for database operations, query development, and data validation.
- Participated in debugging, testing, code reviews, and Agile software development activities.

Technical Skills

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring Security, REST APIs, Hibernate

Frontend: Angular

Database: PostgreSQL, MySQL

Tools: Git, Maven, Postman

Concepts: Data Structures & Algorithms, Object-Oriented Programming, RESTful Services, Secure Application Development, Software Testing, Agile/Scrum

Projects & Certifications

- **MelbBank – Enterprise Digital Banking Platform**

Designed and developed an enterprise banking platform using Java, Spring Boot, Angular, and PostgreSQL featuring secure authentication, account management, payments, fund transfers, card management, customer and admin portals, scheduled payments, document management, and role-based access control through secure REST APIs.

- **Web Content Summarizer**

Developed an AI-powered Chrome extension that extracts and summarizes web content through a Spring Boot backend and AI API integration.

- **HomeHunt – Rental Property Management Platform**

Developed a full-stack property management platform using Spring Boot, Angular, and PostgreSQL supporting property listings, search, and rental applications.

- **Java & Spring Boot** – NIIT

- **Oracle Certified Professional: Java SE 11 Developer** – Oracle University
